

Pneumatic access platforms for safe and efficient working at height

# Powered by air

**LIFTMAN™** the original pneumatic lift platform for working safely and efficiently at height.

The advent of the **Working at Height Regulations** has seen increased demand for this versatile and rugged product. Applications are limited only by the imagination and ingenuity of the user.

**Typical applications include:**

- Spray painting – whole vehicles and/or repainting roofs
- Masking – masking areas ready for painting
- Applying signs & decals – allows easy and safe application
- Repairs – execute repairs quickly and safely

**Benefits:**

- Replaces steps, ladders and scaffolding
- Manoeuvre in 3 dimensions delivering improved efficiency and safety over traditional methods
- Use inside or out – even over uneven terrain
- Small 'footprint'
- Reduces operator strain and fatigue
- Durable, reliable, requires minimal maintenance
- Uses same compressed air as a spraygun

**Case studies:**

LIFTMAN™ has provided a stable and safe platform for those working on the refurbishment of channel buoys, which can be up to 5 metres tall when out on dry land.

LIFTMAN™ is also extensively used by the Royal Air Force for working at height safely on a wide range of military aircraft.

LIFTMAN™ provides a highly efficient way to work. It significantly increases job safety and productivity – at low maintenance and operating costs

## LIFTMAN™

- The original
- Perfection through 20 years of operation
- Work safely and efficiently at height
- In everyday use in 34 countries
- User references available

**WALLMAN®** the original, wall-mounted pneumatic lift platform for working safely and efficiently at height. For work on high-sided vehicles — at any height or position. Purpose-designed **WALLMAN®** provides increased safety for operators while significantly improving efficiency and surface-treatment quality.

**Typical applications include:**

- Spray painting – whole vehicles and/or repainting roofs
- Masking – masking areas ready for painting
- Applying signs & decals – allows easy and safe application
- Repairs – execute repairs quickly and safely

**Benefits:**

- Air powered for convenience and safety
- Wall mounted on rails
- 3-Dimensional movement
- 3.25m platform height / 1m forward movement
- Traverse distances up to 40 metres
- Reliable operation and easy maintenance

**User references include:**

- Road and rail vehicle manufacturers and repairers
- Armed forces and support organisations
- Rail / bus operators and Aerospace industry
- Heavy equipment manufacturers

Because **WALLMAN®** is powered only by compressed air, it is safe to use in hazardous environments such as spray booths. The user-friendly platform provides a highly efficient way to work. **WALLMAN®** significantly increases job safety and productivity — at low maintenance and operating costs.
